Endobronchial Ultrasound

13th Annual Interdisciplinary Training Course

Jointly provided by Tufts University School of Medicine and Reliant Medical Group

Course Director
Gaëtane Michaud, MS, MD
Course Co-Director
Armin Ernst, MD

May 28-29, 2015
Wequassett Inn Chatham, MA
This course is designed for pulmonologists, chest surgeons, gastroenterologists and all other health care professionals interested in mediastinal evaluation.

The objective of this course is to review pertinent principles of endoscopic ultrasound and its application in the aerodigestive tract with a particular focus on staging of lung cancer.

At the conclusion of the course, participants will have a solid understanding of the basic principles of ultrasound as they apply to the esophagus and tracheobronchial tree. All procedural indications and cancer staging principles will be reviewed. Performance of endobronchial ultrasound with the radial probe and the dedicated endobronchial ultrasound scope for needle aspiration will be extensively practiced.
