

**TUFMR 2007-2008 Look-Up Conference
Resident Facilitator Instructions**

Feel free to print these instructions for the day of the conference

Dear [Resident Facilitator],
Thank you for facilitating this week's Lookup Conference.

Please bring a prepared clinical question (in PICO format) from a recent patient encounter.
Previous Examples:

Diagnostic tests	chest CT for lung cancer screening?
Medications	SSRIs for premenstrual syndrome?
Procedures	cryotherapy for wart destruction?
Alternative therapies	acupuncture for low back pain?
1° or 2° prevention	ACE inhibitors prevent diabetic renal failure?

Remember...the best questions are **narrow enough** to find the answer quickly, but **broad enough** to ensure that there is research available on the topic.

1. Please ask residents to *****SIGN ATTENDANCE SHEET***** (give completed sheet to Ingrid Long) 'tfmrp\$' shared drive → Academic Conference Materials → Conference Attendance Sign In Sheet 2007

2. Present your **Clinical Question** to the group in **PICO format**

Time = 5-10 minutes

- Preferable to write on board for everyone (visual learners)
- Ask group for feedback to clarify the question, make it more relevant to your patient, or make it more 'answerable'.

PICO format
P atient / Population
I ntervention
C omparison
O utcome

GOAL: practice formulating clinical questions using PICO format

3. Divide group to **Look Up** question in different **Evidence-Based Sources**

Time = 20 minutes

- We prefer to use SUMMARIES of evidence rather than primary research articles for the sake of time.
- Okay to use 1 review/text source such as UpToDate per session, but most people should use sources below

GOAL: become facile using 'reliable, efficient' sources of evidence-based summaries

Preferred Evidence-Based Summary Sources		
InfoRetriever	www.infopoems.com	User: mass Password: TUFMR
BMJ Clinical Evidence	www.clinicalevidence.com	StaffNet→Medical Library
Cochrane Collaboration	www.cochrane.org	StaffNet→Medical Library
TRIP Database	www.tripdatabase.com	StaffNet→Medical Library
Bandolier	http://www.jr2.ox.ac.uk/Bandolier/	
SUM Search	http://sumsearch.uthscsa.edu/	
Journal of Family Practice	http://www.jfponline.com/	
NNT Tables	http://www.jfponline.com/	

4. Discuss **Search Results** and Create a **Consensus Answer**

Time = 15 minutes

- Each group briefly presents their answer to question. Facilitator should write results on board/typed using projector. If possible, include Level of Evidence (i.e. 1a, 2b, 5, etc) and Source (e.g. cochrane).
- Levels of Evidence description & summary: <http://www.eboncall.org/content/levels.html>
- Type consensus answer & send via email to me with Source used and Levels of Evidence.

GOAL: disseminate Look-Up answers to all TUFMR members for use in everyday practice

Let me know if you have any feedback to make this conference more effective and enjoyable for everyone involved.

Tim Stephens,
Academic Chief Resident, 2007-2008
